Trellised, 8-year-old vines planted on southeast-facing slopes produced the grapes for this wine. The vines received supplementary drip irrigation and yielded 8 tons per hectare.

about the harvest: Grown in selected vineyard blocks that have proved to yield rich varietal character, the grapes were picked at optimum ripeness.

in the cellar : Temperature-controlled fermentation in stainless steel tanks involved intensive extraction practices. Following alcoholic fermentation, the wine was transferred to oak barrels. Judicious maturation for ten months in French oak barrels ensured that the fruit is not overpowered by excessive oak flavours.
