Irrigation: Limited irrigation of between 50 and 100mm is applied during drier summers in order to allow for optimum development and ripening of grapes.

Soils: Vary from decomposed granited to well drained sandy loam with gravel underlays.

Coopers: Sylvain, Schahinger & Trust.

Age of vines: 15 - 25 years

Vines per hectare: 3000

Soil: Sandy loam and decomposed granite

Trellising: Bush vines

Yield: Cinsaut - 8 tons per hectare

Shiraz - 6 tons per hectare

Cabernet Sauvignon - 7 tons per hectare

Touriga Nacional - 9 tons per hectare

about the harvest: The three wines that were used to make up this blend were separately harvested at 24.5° Balling.

in the cellar : The grapes were destalked and juice and skins were allowed to ferment down to 5° Balling. Hereafter the juice was drawn off from the skins and transferred to closed fermentation tanks. Any juice remaining in the skins were recovered with the use of a gentle tank press. On completion of the fermentation on staves process the wine was racked from the lees. Blending took place approximately 4 months after fermentation was completed. The wine was then protein and tartrate stabilized before bottling.
