in the vineyard : The 2004 vintage was a very warm vintage yielding ripe full flavoured wines. The fruit is grown mainly at Fairview on the south western slopes of Paarl Mountain. The Fairview Shiraz vineyards are primarily on decomposed granite soils, and have drip irrigation. The other component of the blend is from dry land vineyards in Agter Paarl. This vineyard has deep shale soils. Average yields of Shiraz are kept to below 7 tons/ha by vigorous green harvest.

about the harvest: Harvest Date: February 2004

in the cellar : Grapes were destalked but not crushed. Rhone yeasts were used for fermentation. Malolactic fermentation was completed in stainless steel tanks, the wine racked and sent to barrel for 14 months. French oak is predominantly used for this Shiraz, a touch of new American oak adding some seasoning to the wine.
