

De Wetshof Mine D Or 1998

A deliciously rich wine with high fruity acids and sugars, rounded off with a touch of botrytis.

variety: Weisser Riesling | 100% Rhine Riesling

winery:

winemaker: Danie de Wet
wine of origin: Breede River

analysis: **alc**:8.0 % vol **rs**:82.60 g/l **pH**:3.09 **ta**:7.3 g/l

type: White pack: Bottle

ageing: 5 years

in the vineyard: Climate:

Winter rainfall approximately 300mm per annum. Summer afternoons are fanned by a cool breeze from the Agulhas Coast. Nights are chilly and mist often shrouds the vineyards until late morning during high summer.

Irrigation:

The vineyards are scientifically irrigated with the aid of a fully computerised irrigation system. Thanks to the most modern technology, irrigation on De Wetshof has been turned into an asset promoting the quality of the grapes.

Soils: The gravelly soils are extremely rich in lime with a very high pH - similar to soils of the leading wine growing regions in the world.

Rainfall:

Robertson is a winter rainfall area with approximately 300mm per annum.

Pest Control:

Due to a very dry climate, spraying is minimal comparred to other wine growing

Soil Type: Gravel lime

Rootstock: Richter 99, 110, 101/14 Age of the vines: 16 years

Vines per hectare: 4000

Trellising style: 6 Wire fence system cordon with spur pruning

about the harvest: A Rhine Riesling cultivar is used for this natural sweet wine. De Wetshof has different types of soil as well as different clones for the Mine D Or. Grapes are harvested from a specific clone on low sugar levels and high acid of over 11g/l. A second batch of Rhine Riesling clones is harvested with full ripe berries and high sugar.

Tons per hectare yield: 11 Tons

in the cellar: Both batches are combined and allowed to ferment together. The first batch gives the acidity and the second the full ripe flavour & high sugar. Ther fermentation is stopped when the sugar and acid are perfectly balanced. The result is a wine with a high sugar, high acidity and low alcohol content.

Danie de Wet adjusts his methods of winemaking from year to year, according to weather conditions and grape quality, in the belief that wine is made in the vineyard and not in the cellar.
