The vines, grafted onto nematode resistant rootstock Richter 99, R110 and 101-114, grow under dryland conditions and receive supplementary irrigation by means of an overhead sprinkler system.

about the harvest: The grapes were harvested by hand and machine at 24° Balling during February and March.

in the cellar : They were crushed and then cool-fermented in temperature-controlled stainless steel tanks for two weeks at between 25° and 28°C. After malolactic fermentation the wine was matured in new, second and third-fill wood for a period 12 to 18 months.
