Climate, soil, altitude and slope orientation are selected to capture as much varietal character as possible. The climate is mild with north facing slopes. Cooling breezes from the Atlantic Ocean ensure rich, slow growing crops. Soils are predominantly medium textured and well drained with good water holding capacity.

The vineyards (Viticulturist: Bennie Liebenberg)

The grapes were selected from a single vineyard in the Helderberg area. This was the first harvest from the 3 year old vineyard that is trellised according to the 5-wire hedge system and produced a yield of 7 tons/ha. Pest and disease control was implemented according to South African subjective IPW standards.

about the harvest: The grapes were handpicked at 25 °C 25.5 °C Balling at the end of February.
