in the vineyard : The vineyards (viticulturist: Henk van Graan)

The grapes were sourced from trellised (90%) and bush vines (10%) in the Stellenbosch, Darling and Malmesbury areas situated at an altitude of 100 to 500m above sea level. These vines grow mainly in deep red soils with some sandy loam on mainly south-facing vineyard slopes.

about the harvest: The grapes were harvested by hand from mid January to the end of February at between 21.5Å° and 23.5Å° Balling to offer a spectrum of ripeness from green and grassy flavours to the fuller, more tropical tastes. Yields were an average of 6 tons per hectare.
