in the vineyard : Although the region exhibits a variety of microclimates, all of the growing areas within the appellation have cool night time temperatures that help to keep grape acids intact. The combination of soil diversity and variety of microclimates enable the fruit to mature slowly for ideal aroma and flavour complexities in the wines. The consistency and quality of the grapes are discernible in every vintage with a spellbinding spectrum of layered flavours. A blend of cooler vineyards from the Western Cape were chosen.

about the harvest: Early morning harvest.

in the cellar : 100% tank fermented. Cool fermentation with select imported yeast. Wine is bottled soon after fermentation to retain its freshness.
