in the vineyard : **Vineyard region:** Wine complexity results from blending the grapes of two closely situated vineyard blocks comprising an area of 6ha, nestled in the foothills of the Simonsberg Mountain in Stellenbosch. The vines are planted with a North-South orientation along south-westerly slopes, and their growth supported by a 5-hedge trellis system. Supplementary irrigation is only practised during the hot, dry summer months when the water table is parched. The Indian Ocean is less than 20km away, and gentle afternoon sea breezes drift over the farm and exert a cooling influence against the late afternoon Cape sun.

Vintage: A warm dry summer resulted in excellent healthy ripe grapes, small berries, thick skins and good colour extraction. Yields were low and good concentration was experienced in all the red varieties.
