in the vineyard : The grapes came from a single vineyard with a yield of less than 10 tons per hectare.

about the harvest: Fruit was picked at optimum maturity.

in the cellar : Grapes were fermented dry on the skins at 26° C. Thereafter the free run portion went into new 225 litre oak barrels. Full malolactic fermentation was allowed in barrel. Then the wine was racked and after SO₂ adjustments, it was returned to the same barrels (80% from French and 20% from American origin) for 12 months.
