

Simonsig Sauvignon Blanc 2008

Starbright colour with a vibrant green tinge. Beautifully expressive sweet fruit aromas of yellow Golden Delicious apples, ripe pears and floral notes dominate the bouquet. A tropical fruit salad of melons, guavas and pineapples fill the palate. Sunripened Chenin has a subtle honey and raisin flavour which adds to the layered complexity and smooth silky texture on the finish.

Easy drinking style. Enjoy while youthful and still showing fermentation bouquet.

variety : Sauvignon Blanc | 100% Sauvignon Blanc

winery : Simonsig Family Vineyards

winemaker : Johan Malan

wine of origin : Stellenbosch

analysis : alc : 13.0 % vol rs : 2.5 g/l pH : 3.3 ta : 6.9 g/l

2006: 2006 Winemakers Choice Awards - Diamond Award, Wine Spectator 2007 - 86 rating

ageing : Early drinking style, at its best within 2 years of the vintage date.

in the vineyard : Simonsig Chenin Blanc was the first wine released by founder Frans Malan in 1968. After 33 vintages it is now reaching new levels of popularity world wide. Chenin Blanc makes up 20% of the national vineyard and its versatility and fresh fruit appeal is being rediscovered.

Very cool conditions in the early part of the season were ideal for flavour formation. These conditions lasted up to mid January when temperatures rose significantly and caused ripening to increase rapidly. A welcome shower in early February refreshed the vines and normalised the weather pattern. The nights were cool and south westerly breezes moderated temperatures during the day.

about the harvest: Harvesting started two weeks earlier on 7 February (last year 22 February) and ripeness levels were lower than 2006. Yields were drastically down on last year and some growers reported a 40 - 50% drop in Chenin yield. Very little Botrytis occurred and the vines are more perfumed with elegance and finesse.

in the cellar : Grapes are handpicked, crushed and some lots are given overnight skin contact. Juice is cold settled to brilliant clarity and inoculated with a South African yeast strain well known for producing very fruity wines. The fermentation temperature is initially kept very low (11 to 12°C) and slowly increased towards the end of fermentation when alcohol levels are putting more stress on the yeast. Fermentation towards the end is slow and requires careful nursing to complete. Sur lie ageing is done to enhance flavour development and better mouth feel.
