in the vineyard : The season was very cool except for the hot spell during January.

about the harvest: 2008 harvest was extremely interesting and unpredictable with heat waves, cold spells and rain. A great harvest resulting in beautiful wines with good concentration.

in the cellar : These Special Late Harvest grapes are crushed and transferred to fermentation tanks. After alcoholic fermentation the wine is racked and the tanks are inoculated with malolactic bacteria to complete the secondary fermentation. The wine is then blended and sterile filtered prior to bottling.
