Yield: Between 7 and 12 tons per hectare.

about the harvest: Shiraz is harvested ripe (25° B) and this leads to a fuller, yet softer style of wine.

in the cellar : Cold maceration takes place for 24 hours allowing maximum colour extraction. The juice is then inoculated with specially chosen wine yeast and allowed to ferment at a carefully monitored temperature. Pump-overs are combined with punch-downs are done 3 times per day. Maturation is done on French oak for 8 to 12 months, after which the wine is selectively blended and bottled.
