**in the vineyard :** This wine has been produced from dryland vines established in deep red soils that is rich in organic material and amply feeds the roots. Planted in 1997, the vines are established on north-westerly-facing slopes, 120m above sea level, in soils originating from decomposed granite. The vines are grafted onto nematode and phylloxera resistant rootstock Richter 110 and are trellised on a five-wire system.

**about the harvest:** The grapes were harvested in mid-February, at 25° Balling, yielding 6 tons/ha

**in the cellar :** After destalking and crushing the mash was fermented using a pure yeast culture NT50. Fermentation took place in rotation tanks at 28° C over seven days, after which the skins were pressed. Once malolactic fermentation had taken place, the wine was matured in French and Hungarian oak barrels for 14 months.
