in the vineyard : The vineyards used to produce our Sauvignon Blanc are planted in an East-West direction to avoid direct sun exposure of the bunches and to protect the delicate tropical flavours. The vines grow in deep Oakleaf soils irrigated according to soil moisture availability and leaf water potential.

about the harvest: Grapes were handpicked on 14th, 22nd and 25th of January 2010

- Bunches were picked at varying degrees of ripeness to maximise complexity and overall flavour range.
- **Analysis:**

	19° Balling	21.0° Balling	22.9° Balling
Sugar			
Acid	10.2g/l	7.55g/l	6.3g/l
pH	2.98	3.15	3.35

in the cellar :

- Grapes were destemmed only to press under reductive conditions.
- Juice was settled with pectolytic enzyme for 48 hours at 9° C before being racked and inoculated with selected commercial yeast cultures.
- Fermentation at 13° - 16° C lasted for 20 days.
- Two barrel fermented portions were also included for complexity and mouthfeel.
- Delicate flavours were retained by careful reductive juice and wine management from grape to bottle.

Production: 15 060 bottles
