

## Fleur du Cap Shiraz 2008

Ruby red in colour, this full-bodied wine shows delightful prune, blackcurrant and cherry on the nose, supported by smokey oak spices. Blackcurrant and cherry flavours follow through onto the palate. The wine has a wonderful mouth feel and a good tannic backbone.

Excellent accompaniment to grilled beef, roast lamb and venison. It also complements duck and quail.

**variety :** Shiraz | 100% Shiraz

**winery :** Fleur du Cap

**winemaker :** Justin Corrans

**wine of origin :** Coastal

**analysis :** alc : 13.14 % vol    rs : 2.06 g/l    pH : 3.2    ta : 6.8 g/l

**type :** Red    **body :** Full    **taste :** Fruity    **wooded**

**pack :** Bottle    **closure :** Cork

**ageing :** The wine is drinkable now but will definitely benefit from ongoing maturation.

**in the vineyard :** The continued success of the Fleur du Cap range of wines is the result of a team approach at The Bergkelder that starts with meticulous vineyard selection and is driven by an overriding passion for winemaking and constant experimentation to create a new generation of superior quality wines. The wines are shaped in perfect harmony with the forces of nature to capture the highly sought-after qualities of varietal character and terroir.

### Terroir

Climate, soil, altitude and slope orientation are selected to capture as much varietal character as possible. The climate is mild with south and east facing slopes offering natural protection against late afternoon sun. Cooling breezes from the Atlantic Ocean ensure rich, slow growing crops. The soil is predominately medium textured and well drained with good water holding capacity.

### The vineyards (Viticulturist: Bennie Liebenberg)

The majority of the grapes were sourced from selected 6-8 year old vineyards in Stellenbosch, predominantly from the Bottelary Hills but also from the foothills of the Helderberg Mountain. This wine also includes some grapes from the Malmesbury area, a region showing huge promise for making expressive red wines. These vineyards are located at altitudes ranging from 110 to 160m above sea level. The vines are grown in deep red decomposed granite, as well as sandy and gravel soils, ideally suited to the cultivation of Shiraz grapes. The warm and dry conditions resulted in a yield of 5 tons/ha of healthy grapes with smaller berries and a favourable skin-to-juice ratio. Pest and disease control was implemented according to South African subjective IPW standards.

**about the harvest:** The grapes were harvested on taste from the end of February into the first week of March at 24° - 25°Balling.

**in the cellar :** The grapes were destemmed and crushed and the must inoculated with selected yeast and fermented at 28°C. Phenolic extraction was managed optimally by pump-overs. After fermentation the wines remained on the skins for a further 2 weeks. The wine underwent malolactic fermentation in barrels after which it was matured for 14 months in a combination of new, second-fill and third-fill oak barrels (70% French and 30% American).
