in the cellar : Bunch sorted, de-stemmed and then berry sorted to take out green, pink and raisin berries. Special emphasis was put on berry size to retain the smaller berries with larger skin to juice ration for maximum concentration of flavour and extract. Cold soaking preceded fermentation in a combination of open-top fermenters (1ton) and stainless steel tanks for 14 days at 24° - 26° C. Malolactic fermentation took place in 300l French oak barrels for 18 months. Barrel selections delivered the final product for this youthful Cabernet ambassador.
