about the harvest: 2010 was the second harvest of Sauvignon Blanc at Cold Mountain and will also be remembered as one of the most difficult years! High winds during October/ November and heavy rainfalls during the ripening stage were in the order of the day. Harvesting took place on 3 and 5 March 2010.

in the cellar : The grapes were cooled in a cold room overnight and sorted over a sorting table before being destemmed, lightly crushed and fermented in stainless steel tanks at between 11 and 13 degrees. Once fermentation was completed the wine was left on the lees to attract body untill bottling, which took place on 16 July 2009.
