South Africa's vineyards are mostly situated in the Western Cape region, near to the coast. This is the southernmost region of the African continent, and has a Mediterranean type climate and diverse soils perfectly suited to quality grape production.

Vintage conditions
The 2011 harvest in The Western Cape was warmer and drier than normal, resulting in lower yields, smaller bunches and consequently riper flavours. These seasonal conditions produced sound fully ripe and healthy grapes, with resultant wines rich, soft and generous in flavour.
