**about the harvest:** Harvesting is done by hand to ensure that only healthy and fully ripe grapes reach the cellar. Harvesting for the 2011 Merlot was done from middle to late February.

**in the cellar :** Upon arrival at the cellar the grape bunches are hand sorted before destemming, the loose berries undergo a further hand sorting before it is lightly crushed. Fermentation took place in stainless steel tanks. Regular pump-overs (3 times a day) are done to extract colour and flavour. The Merlot was fermented dry on the skins before pressing. The free run wine was kept apart from the press fraction.

A part of the Merlot wine underwent malolactic fermentation in barrels, while the rest completed MLF in tank. A Selection of new, 2nd fill and 3rd fill French oak barrels were used to matured the Merlot for 12 months. Regular rackings resulted in excellent integration between wood, fruit and tannins.
