

SAAM Mountain Cabernet Sauvignon 2012

A deep purple colour, with black berry and cherry flavours. The intensity of the fruit carries through to the palate with rounded tannins and hints of vanilla. The aftertaste is long and well balanced.

Suitable for vegetarians, but not for vegans. This full bodied and well balanced wine is ideal to enjoy with lamb, mutton, steak, veal or chicken pie.

SAAM means "together". It defines the qualities which unite to create this beautiful range. SAAM offers an ethical approach to winemaking and a quality wine drinking experience, which lets the consumer feel well-satisfied about their purchase.

Our Unique Proposition

SAAM Mountain winemakers have crafted award-winning wines that showcase the best of the Paarl wine region, home of the brand's vineyards. The concentrated fruit grown from majority dry land bush vines within this ward, is the basis of the SAAM Mountain style. These elegant, soft and dimensional wines offer complexity and aging potential, but is unique in its light style to appeal particularly to the European palate. SAAM's vision was to marry the best of origin with French heritage, to offer undeniable elegance. With a focus on sourcing premium quality grapes from specific farms, the resulting collection of wines highlight a style that is both elegant and approachable – the signature of SAAM Mountain.

in the vineyard :

Soil type: Malmesbury shale's

Root stock: Richter 110

Type of climate: Moderate sunny days with cool nights and sea breezes from both Atlantic and Indian Ocean in the afternoon.

Winemaking and Vineyard Management

The SAAM Mountain wines are fine examples of wines made from vineyards grown under un-irrigated conditions. As is the case when using small berries, these wines show a voluptuous bouquet and a rich after taste, leaving you with much food for thought. Maturation occurs in stainless steel tanks for the white wines, whilst the reds enjoy influences of French oak.

Every vine and vineyard block have a different micro climate due to the soil, gradient & location, in other words, terroir. This creates variation in grape character, which follows through to the final product.

Our two soil types are:

Granite – which is a lighter soil type and our early season cultivars like Chenin Blanc are cultivated on this type of soil. Granite gives a character of minerality to the grapes/wines.

Shale – this is a more condensed soil type with the major component being clay. Clay has good water retention and is most suitable for late season cultivars, being the red cultivars.

The shale soils have high levels of salinity enhancing the flavour profiles of our wines.

Our vineyards are mostly planted on Malmesbury shales and decomposed granite soils.
