about the harvest:

Harvested early in the morning.

Sugar at Harvest: 25° B

Yield: 7 t/ha

in the cellar :

Bunches and berries were very small, (average bunch weight approx. 125g) which we believe ensured the high extract of the wine. The berries were "crushed" into stainless steel tank and inoculated with yeast. Pump overs were done every 4 hours for 20 minutes to extract the colour and flavours. At 0 °B the wine was racked and the skins pressed. The wine was inoculated with malolactic bacteria and took place in a combination of 70:30 French and American oak barrels. Wine was racked after malolactic fermentation and put back into barrel for 16 months.
