about the harvest: Harvest: 6 March 2014 br /Average Yield: 5.08 tonnes per hectare

in the cellar : Yeast (Laffort Zymaflore RX60) was inoculated within 24 hours after crushing then fermented for 10 days on skins at an average temperature of 23°C. Pressed at approximately 2°balling. Acidity was adjusted using tartaric acid to correct pH, both prior to fermentation and during malolactic fermentation. Malolactic fermentation induced in barrel and completed within six months. The wine was barrel matured using French (third, fourth and older fill) 225 litre oak barrels for 12 months. After racking from barrel the wine was very lightly fined and again racked from tank to tank. No filtering of the wine was undertaken except at bottling when a 5-micron filtration was used
