type : White **style** : Dry **body** : Full **taste** : Fruity

pack : Bottle **size** : 750ml **closure** : Screwcap

Chrysanthemoides monilifera is a fast growing shrub with bright yellow daisies in autumn and winter followed by edible berries. They love well-drained soils on hills and mountains, rich in fynbos. This indigenous plant is very popular with birds and bees which makes it a great home for the Cape Dwarf Chameleon.

in the vineyard : Location & Climate: The distinct ravine which embodies Stellenbosch Kloof harnesses all the qualities of a well-orientated compass. Varying elevations and aspects allows us to grow a selection of classic varieties to specific sites that optimise this expression through their location. The cooler south- and east-facing aspects, unique in Stellenbosch, hosts the more sensitive and aromatic white-skinned grape varieties.

Stellenbosch Kloof enjoys a cooler Mediterranean climate with maritime influences from False Bay, 14km to the south, and a refreshing breeze channelled from the West Coast's Benguela current 24km to the north-west. These two breezes culminate at the top end of the ravine and bring in early morning mists, especially from False Bay. Consequently, temperatures in our meso-climate can be measured at least 3° Celsius cooler than inland Stellenbosch during ripening periods. This adds a unique characteristic to Jordan wines.

Appellation: Wine of Origin Stellenbosch.

Soil: Decomposed granite and loam.

Aspect: Cool south - and east-facing vineyards, 220m above sea level.

Age of vines: 20 - 35 years old.

about the harvest: The grapes were harvested late in February of 2017.

in the cellar : The wine was tank-fermented using predominantly Vin7 and Vin13 yeast to accentuate the fruit and flavours typical of these varieties. Selected tanks received extended lees contact to add richness to the blend.
