Soil: Deep red, Hutton, Clovelly soils

Trellising: Hedged (Perold system)

Yield: 4 - 6 tons/ha

about the harvest: Only the best grapes were selected and harvested by hand at 24° Balling.

in the cellar : A pure yeast culture was added, during fermentation it was pumped over frequently until it was dry. After malolactic fermentation it was pumped over frequently until it was dry. After malolactic fermentation was completed the wine was racked twice before going into 225 litre French oak barrels for 12 months. The best barrels were selected and blended after which the wine was bottled without being stabilised or filtered.
