in the vineyard :

The fruit was sourced from 35 specially selected grape growing families in the Robertson Valley. Vines are grown in deep cool, alluvial soil that is rich in lime and receives an annual rainfall of only 280 mm per year. Fruit was harvested very early in the morning from the last week of February to the middle of March from the specially selected grape growers in the Robertson Valley.

about the harvest:

The wine was harvested at optimum flavour from a selection of vineyards.

in the cellar :

Keeping the fruit separate throughout fermentation, wines were produced with varying flavours and palate weight allowing a diverse choice when it came to blending. Fermentation temperature: 26° - 28°C
