*Available: Europe / UK*

**in the vineyard :** The grapes were sourced from vineyards in and around the Western Cape. Planted between 1990 and 1998, the vines are grown in decomposed granite, Kroonstad and Swartland soils. The vineyards are situated on south to south-westerly facing slopes, some 80m to 150m above sea level. Grafted onto nematode-resistant rootstock Richter 99, 110 and 101-114, the vines receive supplementary irrigation from an overhead sprinkler system. Yields averaged between 8 and 10 tons per hectare.

### **in the cellar :**

The grapes were harvested by hand and machine at 23° to 24,5° Balling from the end of January to mid-February. They were crushed and cool-fermented in temperature-controlled stainless steel tanks at 25°C to 28°C for approximately two weeks. After malolactic fermentation, the wine was matured in contact with French and American oak for a period of three months.
