Named after Louis Albert Péringuey, the 19th Century Inspector-General of Vineyards in the Cape, who led the fight against phylloxera and supervised the importation of American rootstocks onto which the various vineyard varieties were grafted.

in the vineyard : The distinct ravine which embodies Stellenbosch Kloof harnesses all the qualities of a well-orientated compass. Varying elevations and aspects allows us to grow a selection of classic varieties to specific sites that optimise this expression through their location. The cooler south- and east- facing aspects, unique in Stellenbosch, hosts the more sensitive and aromatic white-skinned grape varieties.

Stellenbosch Kloof enjoys a cooler Mediterranean climate with maritime influences from False Bay, 14km to the south, and a refreshing breeze channelled from the West Coast's Benguela current 24km to the north-west. These two breezes culminate at the top end of the ravine and bring in early morning mists, especially from False Bay. Consequently, temperatures in our meso-climate can be measured at least 3° Celsius cooler than inland Stellenbosch during ripening periods. This adds a unique characteristic to Jordan wines.

Appellation: Wine of Origin Stellenbosch.

Soil: Decomposed granite and loam.

Aspect: Cool south- and east-facing vineyards, 220m above sea level.

Age of vines: 37 years

Clones: Montpellier

about the harvest:

The grapes were harvested between the 20th of February and the 25th of February 2019 between 21.1 - 22.4°B.

in the cellar :

After gentle pressing followed by cold-settling for 2 days, the juice was barrel-fermented in 228L in 4th fill Burgundian-shaped barrels, and matured "sur-lie" in the barrel for 7 months with occasional "barrel rolling" to add richness to the palate. To accentuate the fresh citrus flavour, 42% tank-fermented Chenin Blanc was blended

with the barrel fermented portion.
