in the vineyard : Terroir. Climate, soil, altitude and slope orientation are essential elements required in capturing as much varietal character as possible. The climate is mild to warm with southern winds, ensuring grapes are cooled to optimum temperature for maximum character and flavour. Soils are predominantly medium textured and an average annual rainfall of 800 mm ensures minimal irrigation.

in the cellar : No "dosage" were added - safeguarding the freshness and crispness of the natural. Produced by Saltare wines and labelled by Marianne Wines.
