in the vineyard :

The grapes were sourced from vineyards in the Paarl, Wellington, Durbanville, Stellenbosch and Darling areas. The vines, planted between 1985 and 1995 at altitudes of 50m to 150m above sea level, are grown in a variety of soils and terroirs well suited to the cultivars. Grafted onto nematode-resistant rootstocks Richter 99, R110 and 101- 114, the vines received supplementary irrigation.

in the cellar :

The grapes were harvested by hand and machine at 19° to 22° Balling in January and February. The fruit was crushed and allowed four to six hours of skin contact to extract the delicate rose colour and varietal aromas. The juice was fermented in stainless-steel tanks at 15° to 16°C.
