### ageing :

Ideal for drinking now, it will retain its vibrancy for at least 5 years.

**in the vineyard :** Cloned from French plant material and planted between 1997 and 2009, the vines are grafted onto Richter 99 and Richter 110 rootstocks and grow in Tukulu soils. The vines are vertically trellised on hedge systems of varying height according to their individual vigour. The south-west facing vineyards are exposed to the cooling effect of False Bay breezes which protract ripening and make for more concentrated intensity of flavour.

**about the harvest:** The grapes were harvested by hand towards the end of February 2022 between 23° and 24° Balling.

**in the cellar :** After crushing and clarification by flotation, the juice was inoculated with selected dry yeasts and cool-fermented for three to four weeks, in temperature-controlled stainless-steel tanks between 14° and 16° C. Following the completion of the fermentations, the tanks were topped up and the wines left on their yeast lees for a month and a half in order to gain in complexity before being blended and readied for bottling. The first bottling took place on 12 April 2022. Total production was 22 424 bottles.
