**in the vineyard :** In the vineyard, harvest began early in the season at lower sugar levels to achieve the mouth-watering, natural freshness required for the making of great base wines in classic Méthode Cap Classique style. Grapes were hand picked.

**in the cellar :** In the cellar, the process begins with a whole-bunch press in separate lots to capture all the grapes' natural flavours. Only the finest free-run juice was used for fermentation. Upon completion, the tank was filled and left on the primary lees until blending for extra flavour and dimension. The final blend of the base wine was then stabilized and filtered. The sugar level of the wine was adjusted to 24 g/l followed by the addition of the 'liqueur de tirage' (yeast) for the second fermentation.
