2024 Ultra Value Wine Challenge - Double Gold

"Spier Signature wines capture in a glass what Spier does best: making quality wines that are true to each grape variety's unique flavour. Every time."

in the vineyard : The vertical trellised vines were planted between seven and 22 years ago on undulating hills of decomposed granite and weathered sandstone. Where the clay subsoils are too structured and porous, supplementary irrigation is used to ensure optimal foliage and even ripening. These vineyards are planted up to 80km from the coast with geographical influence from mountains and the cold Atlantic coast. Complexity is achieved by blending these different regional wines.

about the harvest: Grapes were harvested at optimal ripeness.

in the cellar : Grapes were gently crushed and destemmed to stainless steel tanks. Fermentation lasted up to 12 days on the skins before a portion of the wine 20% was transferred to neutral barrels, and the balance to stainless-steel tanks with French-oak staves for malolactic fermentation and maturation. The wine matured for a minimum of 12 months before blending.
