about the harvest: Grapes were harvested in the early morning to ensure cool, healthy fruit reached the cellar in optimal condition.

in the cellar : The grapes were destemmed and fermented on the skins with regular pumpovers to promote gentle tannin extraction and enhance fruit expression. After pressing, the wine was transferred to a combination of stainless steel tanks and seasoned (second and third-fill) barrels, where malolactic fermentation was completed. Maturation continued for an average of 18 months before final blending and bottling.
