in the vineyard : Gentle slopes exposed to the micro-climate of the Atlantic Ocean results in the vineyards being influenced by the cool air-flows and morning mists so typical of a maritime climate. In summer a firm south-easter wind fans the vines ensuring temperate and sunny ripening conditions. Along with dryland farming on soils of decomposed granite with a high clay content, the vines offer intensely flavoured fruit, resulting in wines of elegance, character and structure.

in the cellar : The grapes were night harvested at optimum ripeness. Crushed and destemmed. Skin contact of 6 hours, pressed and settled for 12 hours. Racked and inoculated with selected yeast. Three weeks' alcoholic fermentation, temperature controlled at 14-16°C.
