ageing : Ideal for drinking now but will gain character and complexity with the correct cellaring.

in the vineyard : Planted in 2000s, the vines are grafted onto Richter 140 rootstocks. Soils are decomposed granite and sandstone. The vines are vertically trellised on five-wire system. The vineyards are mostly planted on south-east facing slopes around 220m above sea level. The cooling effect of the False Bay breezes are beneficial to the slow ripening of the Merlot.

about the harvest: The grapes were harvested in mid-March at an average balling of 23.7°

in the cellar : After destalking and crushing, the juice was inoculated with selected pure yeast. Fermentation was about 15 days and took place in rotation tanks at 24 °C to 28°C. After malolactic fermentations, the wine was transferred to 300 -litre French barrels to mature for 18 months. Bottling took place on the 12 October 2023. Total production was 20800 bottles.
