in the vineyard : As the Valley lies less than 20km from the False Bay coast, it is greatly affected by the cool south sea breezes, which prevail in the summer months. Winter brings on the moisture-laden northwest winds, which result in most of the Valley's 750 mm of annual rainfall.

Soil: Deep red, decomposed Granite soil.

Trellising: Hedged (Perold system).

about the harvest: Yield: 5 tonnes / ha

in the cellar : Grapes were harvested from a single vineyard at 24°B. The fermentation took place at 25 °C - 28°C with pump-overs at regular intervals.

Fermented until dry before being pressed, only the free-run wine was used.

Malolactic fermentation was allowed before maturation in 1/3 new and 2/3 second fill barrels for 12 months.
