about the harvest: The grapes were handpicked at 24^Å Balling and transported to the cellar in small bins.

in the cellar : After destemming and crushing the mash was inoculated with French yeast and fermentation was slow over 3 weeks. After fermenting dry at 20-22^ÅC the wine was left on the skins for 1 month. The must was pressed and the pressed juice was added to the free run juice. After settling for a day the wine was transferred to barrels. Malolactic fermentation occurred naturally. The wine matured in new French oak barrels for 1 year.
